

# INDEX

Unit		Page
<b>KNOWLEDGE AREA</b>	<b>MATTER AND MATERIALS</b>	<b>13</b>
<b>Unit 1</b>	<b>MACROSCOPIC PROPERTIES OF MATTER</b>	<b>13</b>
	Activity 1	15
	Case study: Mopani worms	16
	1.1 Mixtures	17
	Practical activity 1	19
	1.2 Pure substances	20
	Activity 2	21
	Practical activity 2	22
	1.3 Names and formulae of substances	23
	Activity 3	28
	Exercise 1	29
	1.4 Properties of materials	31
	Practical activity 3	32
	Activity 4	34
	1.4.1 Electrical conductors and insulators	35
	Experiment 1	35
	1.4.2 Thermal conductors and insulators	37
	Experiment 2	37
	1.4.3 Magnetic and non-magnetic materials	39
	Experiment 3	39
	Exercise 2	41
	Summary of Unit 1	43
	Mind maps of Unit 1	44
<b>Unit 2</b>	<b>STATES OF MATTER AND THE KINETIC MOLECULAR THEORY</b>	<b>45</b>
	2.1 States of matter	45
	Practical activity 4	45
	2.1.1 Various states (phases)	46
	Practical activity 5	51
	2.1.2 Determining the state of a substance by looking at melting and boiling points	51
	Exercise 3	52
	Experiment 4	53
	2.2 Kinetic molecular theory	56
	Exercise 4	57
	Summary of Unit 2	60
	Mind maps of Unit 2	62
<b>Unit 3</b>	<b>THE ATOM: THE BASIC BUILDING BLOCK OF ALL MATTER</b>	<b>63</b>
	3.1 Atomic models	63
	Activity 5	65
	3.2 Atomic structure	66
	Activity 6	68
	3.3 Isotopes	69
	Exercise 5	70
	3.4 Electron configuration	73
	Exercise 6	75

	Summary of Unit 3	78
	Mind maps of Unit 3	81
<b>Unit 4</b>	<b>THE PERIODIC TABLE</b>	<b>83</b>
	4.1 Composition	83
	4.2 Information	84
	4.2.1 General information	84
	4.2.2 Zigzag line	85
	4.2.3 Valence electrons	85
	4.2.4 Reactivity	86
	4.2.5 Atomic mass and atomic number	86
	4.2.6 Trends in the Periodic Table (periodicity)	87
	Activity 7	89
	4.2.7 Atomic radius	90
	4.2.8 Ionisation energy	90
	4.2.9 Electron affinity	92
	4.2.10 Electronegativity	92
	Activity 8	93
	Exercise 7	94
	Summary of Unit 4	98
	Mind maps of Unit 4	101
<b>Unit 5</b>	<b>CHEMICAL BONDS</b>	<b>103</b>
	5.1 Covalent bonds	104
	Exercise 8	105
	5.2 Ionic bonds	106
	5.3 Metallic bonds	107
	Practical activity 6	107
	Exercise 9	108
	Summary of Unit 5	110
<b>Unit 6</b>	<b>MATTER IS COMPOSED OF PARTICLES</b>	<b>111</b>
	Experiment 5	112
	Practical activity 7	113
	6.1 Chemical bonds	114
	6.1.1 Covalent bonds	114
	6.1.1.1 Covalent molecular structures	114
	Case study: The buckyball or buckminsterfullerene	114
	6.1.1.2 Covalent network structures (macromolecules)	116
	6.1.2 Ionic bonds	116
	6.1.3 Metallic bonds	117
	6.2 Different types of formulae	117
	6.2.1 Molecular formulae	117
	6.2.2 Empirical formulae	117
	Practical activity 8	117
	6.3 Models of molecules	118
	Activity 9	119
	Exercise 10	121
	Summary of Unit 6	122
	Mind maps of Unit 6	123
	Question paper	124
<b>KNOWLEDGE AREA</b>	<b>CHEMICAL CHANGE</b>	<b>131</b>
<b>Unit 1</b>	<b>PHYSICAL AND CHEMICAL CHANGE</b>	<b>131</b>

	1.1	Separation of particles	131
	1.1.1	Physical change	131
	1.1.1.1	Change of condition (state)	132
		Practical activity 9	134
	1.1.1.2	Change of shape	135
	1.1.1.3	Colour change	136
		Exercise 11	136
	1.1.2	Chemical change	138
		Practical activity 10	139
	1.1.3	Change in particles and mass	140
		Experiment 6	140
		Experiment 7 (demonstration)	141
		Exercise 12	143
	1.2	Laws	144
	1.2.1	Law of constant composition	144
		Practical activity 11	145
	1.2.2	Law of conservation of mass	146
	1.2.3	Law of volume relationships in gas reactions	146
		Practical activity 12	147
		Experiment 8	148
		Experiment 9	148
		Exercise 13	150
		Summary of Unit 1	151
		Mind maps of Unit 1	153
<b>Unit 2</b>		<b>WRITING AND BALANCING CHEMICAL EQUATIONS</b>	<b>155</b>
	2.1	Balancing of chemical reactions	155
		Exercise 14	158
	2.2	Energy changes	159
		Exercise 15	160
		Summary of Unit 2	161
		Mind maps of Unit 2	162
<b>Unit 3</b>		<b>REACTIONS IN AQUEOUS SOLUTIONS</b>	<b>163</b>
	3.1	Ions in aqueous solutions	163
	3.1.1	Dissociation and ionisation	164
	3.1.2	Hydration	165
	3.1.3	Chemical equation for the dissolution process	165
		Practical activity 13	166
		Case study: Hard and soft water	167
		Case study: Acid rain	168
		Exercise 16	170
	3.2	Electrolysis and the extent of ionisation as a measure of conductivity	171
		Experiment 10	172
		Exercise 17	173
	3.3	Precipitation reactions	174
	3.3.1	What is a precipitation reaction?	174
	3.3.2	Method of writing equations for the precipitate reactions	175
	3.3.3	Tests for anions	175
		Experiment 11	176

	Exercise 18	178
	3.4 Other chemical reactions in aqueous solutions	181
	3.4.1 Ion exchange reactions	181
	A. Precipitation reactions	181
	B. Gas formation	181
	C. Acid base reactions (transfer of protons)	182
	3.4.2 Redox reactions	184
	Experiment 12	185
	Exercise 19	187
	Summary of Unit 3	189
	Mind maps of Unit 3	191
<b>Unit 4</b>	<b>QUANTITATIVE ASPECTS OF CHEMICAL CHANGE</b>	<b>193</b>
	4.1 Mole concept	193
	4.1.1 Atomic mass	196
	4.1.2 Molar mass and formula mass	196
	Exercise 20	198
	4.2.1 Relationship between mole, mass and molar mass	199
	4.2.2 Empirical formula	200
	Exercise 21	202
	4.3 Determining the composition of compounds	204
	4.3.1 Determine the amount of mol water of crystallisation in copper(II)sulphate	204
	4.3.2 Percentage composition of a compound	204
	Exercise 22	205
	4.4 Molar gas volume and concentration	206
	4.4.1 Molar gas volume	206
	Exercise 23	207
	4.4.2 Concentration	210
	Exercise 24	211
	4.5 Stoichiometric calculations	212
	4.5.1 Calculations based on balanced equations	212
	Exercise 25	215
	Summary of Unit 4	218
	Mind maps of Unit 4	220
	Question paper	221
<b>KNOWLEDGE AREA</b>	<b>CHEMICAL SYSTEMS</b>	<b>227</b>
	<b>HYDROSPHERE</b>	<b>227</b>
	1. Why is water important?	228
	2. The water cycle is necessary because...	228
	3. Processes in a hydrosphere	230
	4. The distribution of water	231
	Exercise 26	232
	5. Systems on earth	235
	6. How does sunlight influence the water cycle?	237
	7. The hydrosphere's interaction with	238

7.1	Atmosphere	238
7.2	Biosphere	238
7.3	Lithosphere	239
8.	Influence of dams on the environment	240
	Activity 10	241
	Project: Quality and purity of water	242
	Exercise 27	243
	Summary of Knowledge Area	248
	Mind maps of Knowledge Area	250
	Question paper	253
	Information sheets	257
	Work cited	259
