

INDEX

1 Work schedule

- 1.1 Term 1
 - 1.1.1 Skills
 - 1.1.2 Mechanics
 - 1.1.3 Matter and materials
 - 1.1.4 Mechanics
- 1.2 Term 2
 - 1.2.1 Mechanics
 - 1.2.2 Waves, sound and light
 - 1.2.3 Chemical change
- 1.3 Term 3
 - 1.3.1 Electricity and magnetism
 - 1.3.2 Matter and materials (Physics focus)
 - 1.3.3 Chemical change
 - 1.3.4 Chemical systems
- 1.4 Term 4
 - 1.4.1 Physics revision
 - 1.4.2 Chemistry revision
- 1.5 Weighting of topics – teaching time
- 1.6 Calendar with work schedule

2 Assessment

- 2.1 Formal assessment
 - 2.1.1 Practical work
 - 2.1.2 Control tests and examination
- 2.2 Informal assessment
- 2.3 Weighting of assessment and year marks
- 2.4 Recording and reporting
- 2.5 Moderation
- 2.6 Processing of marks
- 2.7 Scientific report

3 Lesson plans

Term 1

Lesson plan 1 – 3 (Physics)

Lesson plan 4 – 5 (Chemistry – in Chemistry Preparation File)

Lesson plan 6 (Physics)

Term 2

Lesson plan 7 – 8 (Physics)

Lesson plan 9 – 11 (Chemistry – in Chemistry Preparation File)

Term 3

Lesson plan 12 – 15 (Physics)

Lesson plan 16 – 17 (Chemistry – in Chemistry Preparation File)

4 Reports

- 4.1 Mark sheet for Physical Sciences
- 4.2 Mark sheet for school
- 4.3 Mark distribution
- 4.4 School moderation
- 4.5 Cluster moderation
- 4.6 Unfinished portfolio tasks

5 Masters for transparencies

- 5.1 Skills
- 5.2 Knowledge area: Mechanics
- 5.3 Knowledge area: Waves, sound and light
- 5.4 Knowledge area: Electricity and magnetism
- 5.5 Knowledge area: Matter and materials

6 Assessment tasks

- 6.1 Formal assessment
- 6.2 Informal assessment
- 6.3 Rubric

7 Portfolio: Learner

- 7.1 Cover page
- 7.2 Index
- 7.3 Statement
- 7.4 Mark sheet and moderation
- 7.5 Term 1
- 7.6 Term 2
- 7.7 Term 3

8 Portfolio: Teacher

- 8.1 Mark sheet
- 8.2 Unfinished portfolio tasks
- 8.3 School and cluster moderation
- 8.4 Term 1
- 8.5 Term 2
- 8.6 Term 3

9 CAPS document

10 Examination guidelines

Experiments do not have an investigative question or a hypothesis. However, throughout the Doc Scientia textbooks and workbooks, we ask for an investigative question and a hypothesis. This is done so learners can practise the formulation thereof since it is usually examined in tests and examinations.

Equations of motion calculate the vectors, viz velocity and displacement. This means that if the speed or distance must be calculated using equations of motions, an answer sentence must be used to interpret the answers which are vectors. E.g. if $v_f = 3 \text{ m}\cdot\text{s}^{-1}$, then the speed is $3 \text{ m}\cdot\text{s}^{-1}$.
